KASHMIRA PATIL

: +919156374783 | : kashmiraspatil@gmail.com | LINKEDIN | GITHUB

AI/ML Engineer | Real-Time Systems | Fintech ML | Backend Engineering

SKILLS:

AI/ML Engineering: Machine Learning, Deep Learning, GNNs, NLP, LLMs, RAG (LangChain)
Backend & Systems: FastAPI, REST APIs, System Design, Docker
Programming: Python, C++, Rust, SQL
Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems
Tools: Git, MySQL, Streamlit, React, CI/CD, Agile

EDUCATION:

B. Tech CSE (AI & DS) – MIT World Peace University, Pune
Expected 2027 | Current CGPA: 8.54

TECHNICAL PROJECTS:

QForce – Real-Time Financial Intelligence System | *Aug 2025 – Nov 2025*

- Built and deployed a real-time graph-based ML system for stock prediction and crash detection with live data streaming
- Designed low-latency pipelines (2s refresh) and backend APIs for continuous model inference
- Achieved 4.9% MAPE, 82% crash recall, and +9% portfolio performance

Fraud Detection System (Blockchain-Integrated) | *Sep 2025*

- Developed a low-latency ML-based fraud detection system with blockchain-backed transaction validation (<250 ms)
- Achieved 94% detection accuracy and improved analyst efficiency by 30%
- Designed backend workflows and secure validation pipelines

Lytica – AI-Powered Data Analyst | *Jun 2025*

- Built an LLM-powered data analysis assistant using RAG workflows for automated insight generation
- Reduced manual analysis effort by 70% through intelligent pipelines and visualizations

DAMIEN OS – System-Level Intelligent Assistant | *Oct 2025*

- Built a system-level automation assistant executing 20+ OS-level tasks via Python system APIs.
- Designed modular architecture with concurrent task execution and workflow orchestration
- Reduced manual workflows by ~60% through intelligent automation pipelines

CERTIFICATIONS:

- Fundamentals of AI Agents using RAG and LangChain – IBM *(Pursuing)*
- Data Visualization using IBM Cognos Analytics – IBM

INTERNSHIPS:

AI/ML SDE Intern — Kash Precisions *(Jun 2025 – Aug 2025)*

- Built and deployed automation reducing cheque processing time by 80%
- Developed backend systems for analytics, sales, and inventory workflows

Data Science Intern — ZIDIO Development *(Jul 2025 – Oct 2025)*

- Built transformer-based agents (89% accuracy) and fraud detection pipelines
- Optimized system performance and reduced latency in data pipelines

ACHIEVEMENTS:

- Winner, Smart India Hackathon 2025 (Hardware Edition)
- Winner, HackMIT 2025 (350+ teams)
- Patent Granted — Government of India
- MIT-WPU Student Achiever Award
